MODEL: FS25

- Innovative engineering with an optimized structure for long life and high strength to weight ratio
- Designed with maintenance in mind - large access panels are removable for component replacement

**Piston rotation motor is standard and the machine is center line balanced which eliminates drift**

**Significantly enlarged pivot group dramatically improves performance and durability of the shear**

**Massive two piece piercing tip doubles the size of protected area**

**Unmatched power at the tip**

**Upper and lower jaws are made from 6” high yield structural plate steel which eliminates the need for lamination**

**Nitrocarburized swivel components for durability**

**Elimination of hose inlets and the addition of a contoured reinforcement around the swing bearing to strengthen the body**

**Compact main shaft gives excellent visibility**

---

**SHEAR SPECIFICATIONS**
