MODEL: FS95

- Innovative engineering with an optimized structure for long life and high strength to weight ratio
- Designed with maintenance in mind - large access panels are removable for component replacement

Piston rotation motor is standard and the machine is center line balanced which eliminates drift

Top quality rotation components were selected and are rated for full machine pressure to ensure reliability

Nitrocarburized swivel components for durability

Elimination of hose inlets and the addition of a contoured reinforcement around the swing bearing to strengthen the body

Massive two piece piercing tip doubles the size of protected area

Unmatched Power at the tip

Upper and lower jaws are made from 6” high-yield structural plate steel which significantly reduces the need for laminations

Larger opening and depth of cut

Compact main shaft gives excellent visibility

THE NEW WORLD STANDARD by shearcore™

Unmatched Power at the tip

Larger opening and depth of cut

Compact main shaft gives excellent visibility
